

CSTSETUP.COM

STRAIGHT MAYO SCISSOR

CUTTING & DISSECTING

AKA: Suture scissor, Suture scissors, STRAIGHT MAYO SCISSORS

Primarily utilized for precise suture trimming during wound closure procedures.

CSTSETUP.COM

CURVED MAYO SCISSOR

CUTTING & DISSECTING

AKA: Heavy tissue scissors, CURVED MAYO SCISSORS

Designed for cutting dense fibrous tissues.

CSTSETUP.COM

METZENBAUM SCISSOR

CUTTING & DISSECTING

AKA: Metzenbaum Nelson Scissor, Metz scissors, tissue scissors, Metz, CURVED METZENBAUM SCISSORS

Used for precise dissection of fragile tissues.

CSTSETUP.COM

POTTS SMITH SCISSORS

CUTTING & DISSECTING

Sharp-tipped scissors with side-angled blades (25°, 45°, 60°, 90°, or 125°). Lightweight design.

CSTSETUP.COM

VOLKMAN RETRACTOR

RETRACTING & EXPOSING

AKA: Rake retractor, Israeli retractor, Rake, Israeli

Specialized for superficial tissue retraction in various surgical applications.

CSTSETUP.COM

GOELET RETRACTOR

RETRACTING & EXPOSING

AKA: Bolt retractor

Provides retraction of superficial tissues during minor procedures.

CSTSETUP.COM

KELLY RETRACTOR

RETRACTING & EXPOSING

Provides wound edge retraction.

CSTSETUP.COM

RIBBON RETRACTOR

RETRACTING & EXPOSING

AKA: Malleable retractor, Malleable

Retracts organs and intestines during procedures.

CSTSETUP.COM

RICHARDSON RETRACTOR

RETRACTING & EXPOSING

AKA: Rich retractor, Rich

Retracts wound edges during procedures.

CSTSETUP.COM

ADAIR TENACULUM FORCEPS

GRASPING & HOLDING

Ideal for grasping and holding tissues securely during gynecological procedures.

CSTSETUP.COM

ALLIS FORCEPS

CLAMPING & OCCLUDING

Ideal for securing dense tissues during tonsillectomies, gynecological procedures, or bowel resections where slippery surfaces require firm traction.

CSTSETUP.COM

BABCOCK

CLAMPING & OCCLUDING

AKA: BABCOCK FORCEPS, Babcock Intestinal Clamp, Babcock Atraumatic Clamp

Specifically designed for delicate manipulation of tubular structures like intestines or reproductive organs without causing crush injuries.

CSTSETUP.COM

ROUX RETRACTOR

RETRACTING & EXPOSING

Provides abdominal wall retraction during upper GI and bariatric surgeries.

CSTSETUP.COM

SENN RETRACTOR

RETRACTING & EXPOSING

AKA: Senn Rake, Senn-Miller Retractor

Retracts skin and superficial subcutaneous tissues during minor or small-incision procedures.

CSTSETUP.COM

ARMY-NAVY RETRACTOR

RETRACTING & EXPOSING

AKA: Army Navy, Army's, Navy's, U.S. retractor

Primarily employed for superficial wound retraction to enhance visibility during minor surgical procedures.

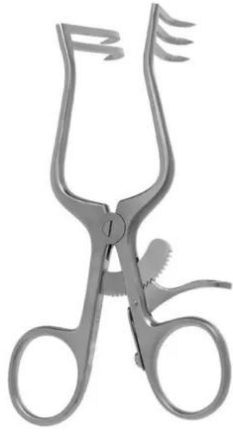

CSTSETUP.COM

TONSIL CLAMP

CLAMPING & OCCLUDING

AKA: Schnidt-Boettcher Tonsil Forceps, Schnidt clamp, Fancy clamp

Used for grasping and stabilizing tonsils during tonsillectomy procedures.

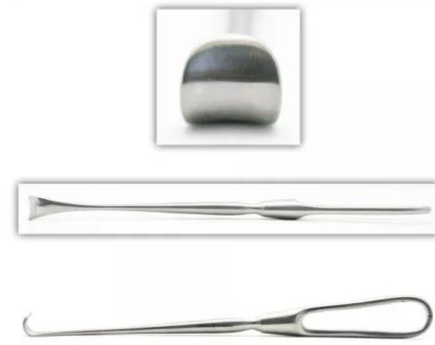

CSTSETUP.COM

WEITLANER RETRACTOR

RETRACTING & EXPOSING

Maintains consistent exposure in confined surgical spaces.

CSTSETUP.COM

CUSHING VEIN RETRACTOR

RETRACTING & EXPOSING

Ideal for exposing veins and tissues in neck surgeries and intermediate-depth procedures.

CSTSETUP.COM

MAYO-HEGAR NEEDLE HOLDER

SUTURING & STAPLING

AKA: Heavy needle driver

Designed for manipulating large needles during closure of deep tissues or fascial layers.

CSTSETUP.COM

ADSON BROWN FORCEPS

GRASPING & HOLDING

AKA: Brown-Adson forceps

Specialized for grasping and aligning delicate tissue edges, particularly in meticulous procedures.

CSTSETUP.COM

CUSHING BAYONET DRESSING FORCEPS

GRASPING & HOLDING

AKA: CUSHING BAYONET TISSUE FORCEPS

Designed for securely holding delicate tissues without causing damage during neurosurgical operations.

CSTSETUP.COM

NON TOOTHED PICKUP

GRASPING & HOLDING

AKA: Non-Toothed Forcep Non toothed forcep Smooth pickup Smooth Forcep, smooth forceps, tissue forceps without teeth, PLAIN

Grasps tissues and applies dressings.

CSTSETUP.COM

MOSQUITO CLAMP - CURVED

CLAMPING & OCCLUDING

AKA: Hartman Mosquito Clamp Curved Mosquito Halstead, Mosquito forceps, HALSTEAD FORCEPS, Curved Mosquito Clamp

Controls minor bleeding in delicate procedures (plastic, pediatric, thyroid, hand surgeries). Also secures fine vascular sutures.

CSTSETUP.COM

FERRIS SMITH TISSUE FORCEPS

GRASPING & HOLDING

AKA: Ferris-Smith coarse tissue forceps, Big ugly forceps

Ideal for handling dense or fibrous tissues during surgical procedures.

CSTSETUP.COM

FORESTER SPONGE FORCEPS

GRASPING & HOLDING

AKA: *Sponge Stick, Fletcher, ring forceps*

Primarily employed to assemble sponge sticks, handle delicate tissues like lung matter, or extract uterine contents.

CSTSETUP.COM

KELLY FORCEPS

CLAMPING & OCCLUDING

AKA: *Kelly*

Ideal for securing bleeders prior to ligation or cauterization in various surgical contexts.

CSTSETUP.COM

KOCHER FORCEPS

CLAMPING & OCCLUDING

AKA: *Koch forceps, Ochsner forceps, Koch, Ochsner*

Essential for securing dense connective tissues during musculoskeletal or fascial procedures where standard forceps would slip.

CSTSETUP.COM

LAHEY GALL DUCT FORCEPS

CLAMPING & OCCLUDING

AKA: *Right angle forceps, Gemini forceps, Mixer forceps, Right angle, gemini, Mixer*

Enables precise dissection and ligature placement around delicate ductal structures.

CSTSETUP.COM

LAHEY TRACTION FORCEPS

GRASPING & HOLDING

Ideal for securing and manipulating dense fibrous tissues.

CSTSETUP.COM

RIGHT ANGLE CLAMP

CLAMPING & OCCLUDING

AKA: Mixer Forcep, Right angle forceps, Gemini forceps, Lahey forceps, Right angle, Gemini, Lahey, MIXTER FORCEPS

Grasps tubular structures to pass ligatures or vessel loops for ligation or retraction.

CSTSETUP.COM

ROCHESTER PEAN FORCEPS

CLAMPING & OCCLUDING

AKA: Pean, Mayo, Kelly-Pean forceps

Clamps large vessels or dense tissue prior to ligation, particularly in deep surgical sites.

CSTSETUP.COM

RUSSIAN TISSUE FORCEPS

GRASPING & HOLDING

AKA: Ukraine, Russian star forceps, Russians

Effective for gripping dense tissues or wound edges during closure, particularly in OB/GYN procedures.

CSTSETUP.COM

SINGLEY TISSUE FORCEPS

GRASPING & HOLDING

AKA: Tuttle thoracic tissue forceps

Secures delicate tissues, dressings, or intestinal tissue in general, urologic, thoracic, and OB/GYN surgeries.

CSTSETUP.COM

ADSON FORCEPS

GRASPING & HOLDING

AKA: Tonsil Schnidt forceps, fancy clamp, tonsil forceps, T & A, Tonsil Schnidt

Specialized for securing small vessels in deep cavities, handling tonsil sponges, or assisting in the creation of ligature passers.

CSTSETUP.COM

CURVED HEMOSTATS

CLAMPING & OCCLUDING

AKA: Crile, Hemostat, snap, stat, CRILE FORCEPS

Controls bleeding vessels prior to cautery/ligation. Also assists in blunt dissection.

CSTSETUP.COM

POOLE SUCTION PROBE

SUCTIONING

AKA: Abdominal sucker, POOLE SUCTION TIP, Poole deep suction cannula

Removes large fluid volumes. Inner cannula suctions femoral shafts in hip replacements.

CSTSETUP.COM

FERG-FRAZIER SUCTION

SUCTIONING

AKA: FRAZIER SUCTION TIP, Frazier Suction Tube, Ferg-Frazier Suction Tube

Evacuates fluid, blood, and smoke from deep, narrow surgical pathways like nasal cavities, ear canals, and neurosurgical fields.

CSTSETUP.COM

YANKAUER SUCTION

SUCTIONING

AKA: Tonsil suction tip, Yankauer suction tip, Yonkers

General wound suctioning. Minimizes tissue trauma during aspiration.

CSTSETUP.COM

KOCHER INTESTINAL FORCEPS

GRASPING & HOLDING

AKA: Kocher intestinal clamp

Grasps vascular pedicles or occludes bowel without trauma

CSTSETUP.COM

BONNEY FORCEPS

GRASPING & HOLDING

Ideal for grasping thick tissues and fascial layers during procedures.

CSTSETUP.COM

DEBAKEY VASCULAR CLAMP

CLAMPING & OCCLUDING

AKA: DEBAKEY PERIPHERAL VASCULAR CLAMP

Provides complete vascular occlusion in peripheral vessel procedures.

CSTSETUP.COM

PENETRATING TOWEL CLAMP

CLAMPING & OCCLUDING

AKA: Towel clip, Backhaus towel clip, Sharp towel clamp

Secures drapes or reduces small fractures; contraindicated for attaching ESU/suction.

CSTSETUP.COM

PRATT RECTAL SPECULUM

RETRACTING & EXPOSING

AKA: Pratt bivalve speculum

Provides exposure and visualization of the anal canal and rectum for examination, exposure, or surgery.

CSTSETUP.COM

AUVARD VAGINAL SPECULUM

RETRACTING & EXPOSING

AKA: Berlind-Auvard Weighted Vaginal Speculum Steiner Auvard Vaginal Speculum, Weighted speculum, AUVARD WEIGHTED

Provides consistent posterior vaginal wall retraction during procedures, utilizing gravity for secure positioning.

CSTSETUP.COM

WEISMAN GRAVES SPECULUM

RETRACTING & EXPOSING

Enables visualization and access during nasal and sinus surgeries.

CSTSETUP.COM

STORZ NASAL SPECULUM

RETRACTING & EXPOSING

Enables nasal cavity examination and access during rhinologic procedures.

CSTSETUP.COM

#3 KNIFE HANDLE

CUTTING & DISSECTING

AKA: #3 handle, scalpel handle

Facilitates precise incisions in surgical settings, particularly for initial skin cuts requiring sharp, controlled dissection.

CSTSETUP.COM

#3 LONG KNIFE HANDLE

CUTTING & DISSECTING

AKA: Scalpel Handle, Long knife, long handle

Ideal for making precise incisions in confined or deep anatomical structures where standard handles lack sufficient length.

CSTSETUP.COM

#7 KNIFE HANDLE

CUTTING & DISSECTING

AKA: Scalpel Handle

Facilitates precise cuts in confined surgical areas.

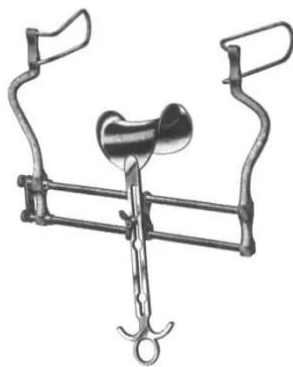

CSTSETUP.COM

TOOTHED FORCEP

GRASPING & HOLDING

AKA: Tissue Forceps, Rat Tooth Forcep, rat tooth, tissue forceps with teeth, Toothed Tissue Forceps

Effective for securing moderate-to-dense tissues during wound approximation and closure procedures.

CSTSETUP.COM

BALFOUR RETRACTOR

RETRACTING & EXPOSING

AKA: Self-retaining retractor, Self-retaining

Essential for large abdominal incisions, providing multi-directional retraction for enhanced surgical access.

CSTSETUP.COM

DEAVER RETRACTOR

GRASPING & HOLDING

CSTSETUP.COM

FOGARTY CLAMP

CLAMPING & OCCLUDING

AKA: Hydragrip, FOGARTY CLAMP WITH JAW INSERTS, Fogarty
Hydrajaw Spring Clamp

Provides atraumatic clamping for delicate vessels and graft materials during vascular procedures.

CSTSETUP.COM

STRYKER DRILL

SPECIALTY

AKA: STRYKER SYSTEM 6 POWER

Enables efficient bone cutting, drilling, and reaming in major orthopedic interventions.
